Griff Akins, 120 Normandy Drive: Supports Traffic Calming devices. The residents present (5) agree with the traffic calming devices. Public Works Director Matt White stated he is consistent on when the speed is 8 mph over. This speed study is 7 mph over, this is borderline so he would not object to the installation. The Speed Cushions that have been installed have proven effect. He would install two between Beach and Chandler. Valerie Akins, 120 Normandy Drive, concerned that two speed cushions would not slow down for the entire length of the street. Public Works Director Matt White explained why we can't install Stop Signs. He would like to conduct another Speed Study for the other area. Michael recommended placement West of the access to the Playground and East of Beach.

Motion to end debate made by Regina Henry, 2nd by Michael Mullins.
No objections voiced.
Motion to install 2 traffic calming devices on Normandy Drive and to conduct an additional speed study made by Regina Henry, 2nd by Michael Mullins

Hello,
We are self managed.

I have received a majority vote of YES, from the HOA board of directors.

On behalf of the board I have the authority to move forward with this request.

Thank you,

MaryJo,

The 1st attachment are the results from the speed study which shows the 85th percentile speed is 33 mph. This speed meets the warrant for speed calming measures and the HOA can now request to be heard by the Traffic Commission. The 2nd attachment is the ordinance that specifies the requirements for requesting speed calming measures. Please provide a letter from the HOA requesting speed calming measures be considered by the Traffic Commission and specify the amount and general locations. Also, you will need to get a minimum of 5 signatures from different property owners that live on Brookstone Blvd. Attached is an example petition that can be used to obtain signatures. Please send all of this to Sheila Lockett (copied). The next Traffic Commission meeting will be in January. Let us know if you have any questions.

Good question. Yes, the top row is the speed (MPH) range. The bottom row is the number of vehicles that drove in that speed range.

Hi, Matt! Thank you for replying so quickly! Quick question about the data you provided: the charts at the bottom of the page that say eastbound/westbound have two rows of numbers. Is the top number a MPH, and the lower one the number of times that speed range was counted? Or am I looking at that incorrectly? Just trying to read this properly.

Thanks for your help in keeping our community safe!

Sure thing. See attached. The 85th percentile speed was 27 mph, which is 7 mph over the posted speed limit. I typically don't recommend speed control devices until the 85th percentile speed is 8 mph or more. Therefore, it is very close to warranting. I've added Captain Tyler Chandler to the email, who oversees the speed study process. Captain, Normandy Heights is requesting an additional speed study. Let us know if you can get that scheduled.

Hi Matt,

I hope you are doing well. Sentry Management now manages the HOA for Normandy Heights, and I am with them now. My new contact information is below. I am

copying the board of the HOA here; they would like to stay in the loop. Can you provide them with the results of the last speed test? You had said we were right on the line of passing for speed bump approval and could retest in a few months. They would like to schedule a retest as soon as possible. The speeding has gotten out of control, and they are concerned someone is going to get hurt. Any help you can give us would be greatly appreciated.

Thank you.

Sheila Lockett,

Thank you very much for being so kind. My neighbors and myself are very passionate about this issue. There are so many children that play in the street where we live. Again thank you for helping this along.

Kindest regards
