Thank You Ms Taylor I will forward this to some of the neighbors and suggest they submit you a letter.

I Diane and Dan Eldridge do not see the need for speed bumps, the children on the main street play in the street with their basketball and chase after it and also very small children are left to ride their tricycles in the road, do not use the sidewalks, sometimes there is no parent in sight and other times there is, the key I believe to wanting them is so the subdivision streets at least two of them can be for playgrounds. Children in here do not use their backyards to play in. In fact this past July 4th We were entering our subdivision at just almost dark and the main Saddle wood was a Fireworks event with several neighbors that live on that street and their children were in the street setting off fireworks I stopped to let them step off the road in fact one neighbor seemed to be the main on setting them off in the street, they went on with them far longer than the time should have been permitted, some of us work and have small pets that fireworks are a huge issue. I realize some may consider us rude but I call it considerate for your neighbors, also safely take them wee there is a professional setting them off instead of keeping neighbors awake that do not have a week or weekend off. Consideration. We are totally against the speed bumps. I do not notice as many speeders as I do parents and children playing in the street even after dark, basketball goals in driveways and the ball gets away from them and then the ball and them both are in the street and we have to stop. Parents are either inside or not home? We have had a sign placed at the back of our street that someday in the future there will be

a cut thru street. Even with the No Outlet sign out front of our subdivision they still come back here wondering if possible they can cut through and avoid the Lebanon Road backed up traffic morning and evening. We vote no for speed bumps. Some of the least expensive subdivisions and most expensive subdivisions do not have speed bumps, we think this is a tacky ideal. Keep the kids in the yard playing or Charlie Daniels Park, and honestly we do not see that many speeding in this subdivision, it is a wish to have speed bumps to protect their children playing in our streets.

**Thank You,
Dan and Diane Eldridge**

Ms. Eldridge,

I have attached the agenda packet for the 10/15 Traffic Commission meeting at 6PM, here at City Hall, which shows the new speed studies done for the deferrals, including Saddle Wood and Saddle Brook.

If you would email me a letter and/or a list of neighbors who are opposed to the speed calming devices going in, I will happily give them to our board and attach them to the agenda. That way your voice and opinions are heard, even though you cannot make the meeting.

Please let me know if you have any questions or concerns. I hope you have a terrific weekend!

Thank you,

Emily Taylor
