Griff Akins, 120 Normandy Drive: Supports Traffic Calming devices.

The residents present (5) agree with the traffic calming devices.

Public Works Director Matt White stated he is consistent on when the speed is 8 mph over. This speed study is 7 mph over, this is borderline so he would not object to the installation. The Speed Cushions that have been installed have proven effect. He would install two between Beach and Chandler.

Valerie Akins, 120 Normandy Drive, concerned that two speed cushions would not slow down for the entire length of the street.

Public Works Director Matt White explained why we can't install Stop Signs. He would like to conduct another Speed Study for the other area.

Michael recommended placement West of the access to the Playground and East of Beach.

Motion to end debate made by Regina Henry, 2nd by Michael Mullins.

No objections voiced.

Motion to install 2 traffic calming devices on Normandy Drive and to conduct an additional speed study made by Regina Henry, 2nd by Michael Mullins

Vote Yea: Unanimous

This Action Item was deferred to the Mt. Juliet Traffic Commission due back on 7/16/2024

**RESULT:** DEFERRED

**VII. City Staff Reports**

**VIII. Discussion**

**IX. Adjournment**
