Citizens Comment Limited to three (3) minutes per person - Ordinance 2008-24

Citizens Comments: None

Discussion on Sewer Capacity:

Shane Shamanur, City Engineer recapped the reason for the Work session concerning sewer capacity.

Representative from Water Management explained the sewer collection system on the North side of the City. The current station is close to 70 % capacity. Estimated cost to build a new station is 12.1 million, with a location to be at the old Fruit Stand on Lebanon Road that was tore down. This project should be completed in about 2 1/2 years.

The City can cover the cost by establishing an additional capacity charge.

Discussion was held on all areas of the City concerning current sewer capacity along with future sewer capacity as it concerns development.

Discussion was held on all aspects of the current and future city' sewer system.

Questions and answers were held.

3. Adjournment

Adjourned at 6:17 PM

Mayor James Maness

City Recorder Sheila S. Lockett, MMC
